

Shift Equipment & Maintenance Engineer

Based in West Lothian, Kaiam is an emerging market leader in the research, development and manufacturing of optoelectronic equipment used within data-communication centres and the telecommunications industry. Founded by leading technologists from the optical networking industry, the team has a track record of delivering breakthrough approaches that change the rules of the marketplace.

We are now recruiting for **Shift Equipment & Maintenance Engineers**. Supporting the Facilities Manager, you will be actively involved within the execution of maintenance procedures for new and existing equipment and will be heavily involved within providing technical support for our TOSA ROSA assembly and test production line as well as supporting other departments.

Key Responsibilities will include but are not limited to:-

- Providing shift cover for the maintenance department as well as technical support across all production lines
- Establish and implementing TPM for all production equipment
- Carry out existing preventative maintenance as determined by maintenance schedules
- Actively take responsibility for machine uptime
- Ensure all equipment engineering practices and procedures are carried out in accordance with current health & safety legislation
- Liaise with main equipment suppliers about technical servicing issues as required
- Ensure adequate availability of equipment spares for all manufacturing equipment
- Participate as an active member of the Emergency Response Team and in cross training functions

Educated to HND or equivalent within an electrical or electronic discipline the ideal candidate will need to demonstrate a flexible approach to work with excellent communication. Experienced in set up and repair of microscopes and visual aids as well as new equipment installations and repairs this successful candidate must be able to make accurate decisions when under pressure.

With excellent fault finding skills you will be proactive and capable of working without direct supervision and enjoy the challenge of working to deadlines to achieve define targets. Previous experience of working within a fast-paced manufacturing environment is advantageous.
